ACTIVITY

Counter-current systems from Ospa

Ospa counter-current systems transform your pool into a never-ending swimming channel. You know what that means? Swimming without any turning whatsoever! And when you're not in the mood for a fitness challenge, Ospa counter-current systems are also perfect for a relaxed swim or a bit of fun the whole family can enjoy.

A system to suit every swimmer

Ospa has the ideal counter-current system to suit every swimming style and set of requirements. It all comes down to the number of jets and the power range.

Swimming style	Family fun swimming	Endurance swimming	Professional training
Ospa PureSwim	●	○	○
Ospa TopSwim	●	●	○
Ospa PowerSwim 2	●	●	●
Ospa PowerSwim 3.5	●	●	●

● Recommended system

Tailored interval training with Ospa BlueControl®

If you add Ospa BlueControl® to your Ospa PowerSwim or Ospa TopSwim product, you can set up your very own training plan. Save up to six custom training programmes, each with five progressive levels based on your own strength and duration settings. You can even control your counter-current system on the go from your tablet or smartphone.

Ospa sensor button

All Ospa counter-current systems are compatible with the Ospa sensor button, so you can have the controls at your fingertips even when you're in the water.

Ospa PowerSwim 3.5

Train like a pro

You'll struggle to find another counter-current system boasting the super strength of the professional Ospa PowerSwim 3.5 with its FC pump that transforms your swimming pool into a high-end swimming channel that's as wide as it is powerful. Whether you want a sporting challenge, a relaxed swim or a fun activity to entertain the whole family, you need look no further.

- Five Ospa DesignLine stainless steel jets with a cover diameter of 96 mm and no visible fastening screws
- Control via Ospa BlueControl®, the Ospa sensor button or your smartphone
- Six custom training programmes, each with five progressive levels based on your own strength and duration settings
- Natural swim sensation without waves
- No distracting motor noises in the pool
- World-class workouts
- The Ospa PowerSwim 3.5 comes with three different pumps:

Pump power	Circulation volume	Current impulse
5.5 kW	150 m³/h	330 kg m/s
7.5 kW	200 m³/h	542 kg m/s
11 kW	230 m³/h	717 kg m/s

See the product in action:

“It’s amazing how powerful and natural the Ospa PowerSwim’s current is.”

Laura Philipp, 2021 Women’s European Ironman Champion,
3rd in the 2020 PTO Championships in Daytona,
14-times Ironman 70.3 Champion

Power is everything

The power of the counter-current system is continuously variable. In the ideal swimming range, the water flows at a speed of more than 1.5 m per second. To give you an idea, professional endurance swimmers swim at between 1.0 and 1.3 m/s (covering around 100 m in 1 min 20 sec).

Professional endurance swimmers*	Ospa PowerSwim 3.5*
1.0–1.3 m/s	1.5 m/s
3.6–4.7 km/h	5.4 km/h
1 min 20 sec/100 m	1 min 7 sec/100 m

*Example figures

Wide and powerful swimming channel

The even current directed lengthwise is made even stronger by water being suctioned on the side of the pool opposite the PowerSwim jets.

Ospa PowerSwim 2

Made for athletes

From workouts to endurance training, everything is possible with the Ospa PowerSwim 2. The wide and continuously variable current can be adjusted for full-on workouts or relaxing, natural swims, making it ideal for keen athletes and families alike.

- Even current directed lengthwise
- Natural swim sensation
- Full workouts and conditioning training possible
- Custom training programmes available via Ospa BlueControl®
- Control via Ospa BlueControl®, the Ospa sensor button or your smartphone
- Two stainless steel jets with a cover diameter of 96 mm and no visible fastening screws
- Option to install in steps

Pump power	Circulation volume	Current impulse
------------	--------------------	-----------------

4 kW

100 m³/h

212 kg m/s

Current impulse

The current impulse, the resistance the swimmer is met with, says more about the power of a counter-current system than the circulation volume on its own. By controlling the current impulse, subjectivity is taken out of the equation and the swimming sensation can be carefully calculated.

Ospa TopSwim

The all-in-one counter-current system

As a compact counter-current system, Ospa TopSwim ticks all the boxes whether you are looking for athletic endeavours or family fun. The perfect addition to any pool, this crowd-pleaser provides endless enjoyment.

- Natural swim sensation
- Three jets, hair-safe intake and Ospa sensor button in one unit
- Polished stainless steel cover with jets that light up in a colour to match the power setting
- Custom training programmes available via Ospa BlueControl®
- Five custom power settings via the Ospa sensor button
- Energy-efficient FC pump
- Compatibility with all pool types
- Pump power: 3.0 kW

See the product in action:

Ospa PureSwim

Back to basics

The affordable Ospa PureSwim counter-current system is all about what matters most – swimming.

The features are more or less the same as the Ospa TopSwim, with a few differences:

- Constant power setting
- Polished stainless steel cover and jets without illumination

Model	Pump power	Circulation volume	Current impulse
Ospa TopSwim	3.0 kW	64 m ³ /h	175 kg m/s
Ospa PureSwim	3.0 kW	64 m ³ /h	175 kg m/s

Ospa counter-current systems

Whether you want to swim for relaxation, focus on your endurance training, train in the pool like a pro or just have no end of fun in the water, you're bound to find the Ospa counter-current system that will tick all your boxes.

RELAXATION

Ospa MassageT

Well hello wellness

With the MassageT massage station from Ospa, one push of a button is all that stands between you and a relaxing wellness massage.

The four Ospa DesignLine jets are arranged in the shape of a T to deliver the perfect back massage to help you destress after a busy day.

- Four Ospa DesignLine jets arranged in a T-shape
- Control via Ospa BlueControl® or the Ospa sensor button
- Compatibility with all pool types
- Hair-safe suction covers
- Pump: 0.75 kW – 3.0 kW

See the product in action:

Jets arranged in a T-shape

Say goodbye to that tension in your neck!
The arrangement of the jets hits the spot for a perfectly relaxing shoulder and back massage.

Ospa MassagePublic

Spa sensation

The Ospa MassagePublic makes the pool experience all the more enjoyable with relaxation guaranteed.

- Added air for a lovely massage sensation
- Flexible jet arrangement
- Group use
- Targeted massages by arranging jets at different heights
- Pump: 0,75 kW - 3.0 kW

A flexible solution for larger pools

The Ospa MassagePublic comes with eight jets that can be arranged in any formation, allowing for targeted massages and group use.

Ospa MassageLounge

Relaxation with a twist

The Ospa MassageLounge is a brilliant way to unwind after a stressful day. With 60 water jets across three levels, relaxation doesn't get much better than this.

- Ultimate relaxation
- Rounded massage system made from stainless steel
- Three levels with 20 water outlets each
- Visible stainless steel bars

New vitality

Take relaxation to a whole new level with Ospa MassageLounge. The rounded bars with 60 jets across three levels deliver a massage you won't forget in a hurry. Leave the stresses and strains of everyday life behind in style.

Ospa air bubble jet recliner

Bubbly goodness

Ospa air bubble plates in a round or square design

You can't beat the feeling of crystal-clear water bubbling up around you. The bubbling air stream from the Ospa air bubble plate makes your pool experience all the more incredible.

- Round or square air bubble plate for the pool floor
- Full-body massage with bubbles
- RGB LED lighting available
- 60 air bubble jets
- Control via Ospa BlueControl® or the Ospa sensor button
- Size: 500 x 500 mm or Ø 500 mm

See the product in action:

Luminous light

RGB LED lights can be incorporated if you're looking to create stunning lighting effects in the water ranging from subtle to fiery. The perfect finishing touch to the relaxation experience!

Beautiful bubbles

The bubbling air stream from the Ospa air bubble plate makes your pool experience all the more incredible. Built into the pool floor, its 60 powerful air jets bubble with pure relaxation. A must for anyone looking for next-level pampering! You don't even have to worry about how to work the Ospa air bubble jet plate. Take control straight from the pool using the Ospa sensor button or Ospa BlueControl®.

Ospa wild spring

Wild, wild water

The wild spring is ideal for anyone who loves floating on invigorating water jets and the sensation of moving water.

- Powerful jets of water from the bottom of the pool
- Added air for a more intense massage sensation
- A bubbly statement for any pool
- Pump: 3.0 kW

Pure power

The intense jet of water with added air creates a bubbly pool experience you won't forget in a hurry. Once the Ospa wild spring has been installed in the bottom of the pool, switch the powerful jet on to let the fun begin. Working the Ospa wild spring is so simple that it won't affect your state of relaxation in the slightest. Take control straight from the pool using the Ospa sensor button or Ospa BlueControl®.

Ospa wild spring

A subtle solution for invigorating fun in the water.

Ospa neck surge 630

A blast of fun

This stunning Ospa water feature does wonders for the muscles in your shoulders and neck.

- Various attractive stainless steel designs
- Wide water outlet opening
- Massage effect to relieve the muscle tension in the shoulders and neck

Relaxation ready

The Ospa neck surge is on hand to give you a soothing neck and shoulder massage and bring a smile to the face of any child who enjoys playing around in the burst of cool water. There's something to impress all the family!

Ospa waterfall

Whooshing water

Water whooshes into the depths of the pool below. And you can even add clever lighting effects to make the Ospa waterfall even more impressive as an exclusive water feature for use after dark.

- Soothing neck massages to relieve tension
- Custom width and design to suit your specific needs
- Coloured RGB LED fibre optic lighting for impressive effects after dark

AMBIENCE

Ospa ColorPoint

Flowing colours

Water gently ripples out of the Ospa ColorPoint jets. With its built-in lighting, this water feature turns into a stunning statement after dark. But it's still a firm favourite during the day too. It's up to you to decide on the final design and the number of water jets you'd like.

- RGB LED fibre optic lighting
- DMX light projector
- Automatic colour changes with various speed settings
- DesignLine stainless steel covers measuring 96 mm in diameter
- Compatible with other lighting effects and water features
- Pump power: 3.0 kW

Bold beauty

There's no denying that Ospa ColorPoint stands out all day long. And yet it really comes into its own at night, when its gentle water effects can be combined with all the spectacular colours. You can get the colour scheme and ambience spot on for any occasion. Try combining the coloured jets and magical movement of the water with LED underwater lighting to make a bold and beautiful statement.

Colourful creativity
